

Tab Internal Wiring Type Terminal Blocks

BlockMaster's HP Series tab style terminal blocks are suitable for today's requirements in appliances, HVAC equipment, panels and similar products where secondary power distribution is required. Also intended for low voltage control circuit interconnections.

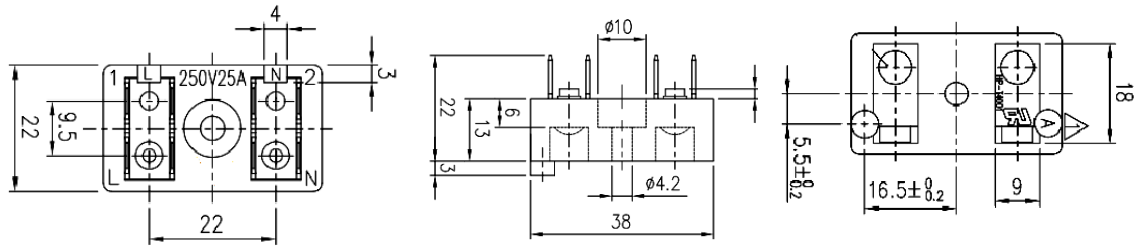

Available with standard 0.250" Q.C. tabs or optional 0.187" Q.C. tabs. These blocks mount with a single fastener and have a peg to prevent rotation. Terminal identification with laser marking is available. Standard configuration of these products are available for immediate delivery.

HP-T4001-36

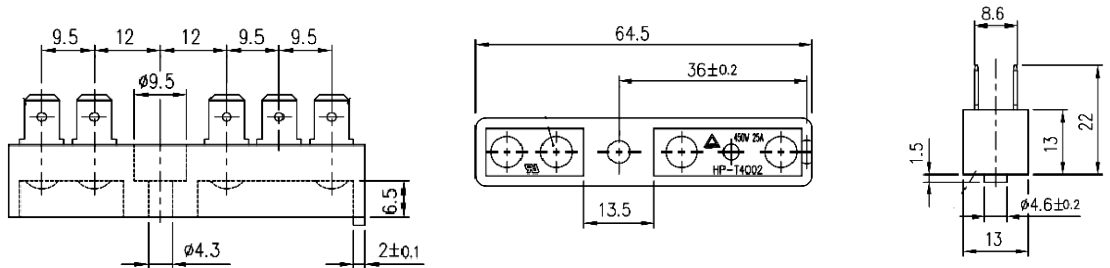

25A/250V

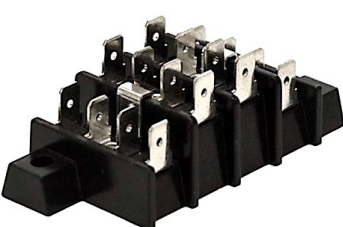

HP-T4002-1

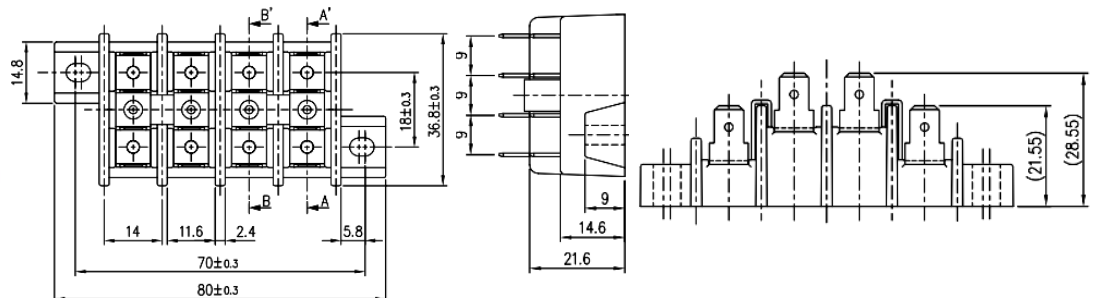

25A/250V

HP-T4003-1L

20A/250V

Tab terminal stations available with or without jumper ganging.
